

# Teacher Website Lesson Plan

## Course Goal:

Participants will create a classroom website that includes a home page, course description, class schedule, assignments, important dates, pictures and your team newsletter, to enhance the communication between school and home.

## Learning Objectives:

After successful completion of this course, students will be able to:

- Create a classroom website
- Build an effective navigation scheme
- Create placeholders for relevant content and images
- Use design tools to keep the web pages up to date and fresh

## Course Outline:

1. Create a website in a format that is compatible with your school district's software and server.
2. Design a site layout and theme that reflects your personality and goals.
3. Develop the following pages:
  - a. About the Teacher
  - b. Course Description & Syllabus
  - c. Homework & Assignments
  - d. Announcements & News Flashes
  - e. Calendar of Events & Important Dates
  - f. Frequently Asked Questions
  - g. Class Schedule
  - h. Photographs
  - i. Links
4. Design an effective navigation system for user's ease and with working links.
5. Review navigation system to ensure links work properly and pages load quickly.
6. Practice updating site, adding pages and changing images.

*This is only a sample. We customize lessons to your ability levels and needs.*
